HISTORIC AMERICAN ENGINEERING RECORD

LEHIGH CANAL AT AQUASHICOLA CREEK

HAER No. PA-178

Location:

Lehigh Canal at Aquashicola Creek, Lower Towamensing, Pennsylvania.

Description:

One of four aqueducts built by the Lehigh Coal and Navigation Company. Built on three wood-crib and stone piers, the aqueduct featured a wooden trough and towpath. Both abutments are in stable condition as are the remains of the three cribbed piers.

Historian:

Peter H. Stott, HAER Inventory card, 1979.
